

CD/DVD-Case - STIL Data Protection

- A unique archival case for a universal use
- Originally, the STIL CD/DVD case was created to answer the needs of the archival field but since, it was discovered by users for their daily use
- Made of unbreakable polypropylene, its shelf life is estimated to about a century.
- The case is fully hinged; the disc floats over the bottom to prevent scratches; and permits it to truly eject in your hand to stop the need to fish the disk out.
- Made of 100% unbreakable, archival safe, inert polypropylene
- Self-releasing patented hub
- Standard colour : transparent (clear)
- On demand available in many different colours or with individual logo (Minimum order quantity per colour/logo: 5.200 pcs.).
Please contact us for a corresponding price offer.

Vented film Cans - STIL Analog Preservation

- A superior casing solution with innovative attributes.
 - Answering to the standards drawn by ANSI, AIIN or SMPTE, the Analog Media Preservation container was designed with the best criteria sod preservation available.
 - The cans are made of 100% prime polypropylene and are vented; the gases produced by the degradation of the film base are evacuated and the Vinegar Syndrome should not develop in them if the film was in a proper condition when put in.
 - Made of 00% archival safe, inert polypropylene
 - Designed allowing ventilation
 - Cans cannot be water soaked and are stackable, interlocking and don't open only by dropping them
 - Cans for 16 mm films can also be used to store audio tapes with sizes 7" and 10".
 - Standard colour : silver-grey
 - On demand available in 6 different colours or with individual logo
- Please contact us for minimum order quantities and a corresponding price offer.
